

## Scenario-based Clinical Exam Retake Policy

After 3 failed attempts at the Scenario-based Clinical Examination, an examinee must wait 2 years before retaking the examination. The examinee must present a petition to the Clinical Committee before registering for the examination for the 4th attempt. The petition must address the following items:

- i. How the examinee plans to prepare going forward?
- ii. What domain(s) require the most attention when preparing based on past results?
- iii. What is the examinee's understanding of the weak performing areas in the past examinations?
- iv. What adjustments will be made in the preparation process going forward?

If the candidate fails the examination after the 4th attempt, they must wait an additional 2 years and petition before registration for 5th exam. After 5 failed attempts at the Scenario-based Clinical Examination, an examinee is no longer eligible to be Board Certified.
